A 1997 General Accounting Office review was even more blunt. It projected \$90 million in annual reductions in operating expenses just to bridge the gap. The GAO was alarmed by the sheer size of the gap and the dwindling number of available efficiency-related options.

Well, where I am from, a marine distress call is an urgent plea for emergency law enforcement and rescue personnel. When oil spills jeopardize economic as well as environmental resources, when frozen rivers trap heating oil barges, when the well-being of both fish and fishermen are threatened, when offshore danger strikes, we know where to turn, to the United States Coast Guard.

That is why when the ink dried on the House Department of Transportation appropriation, there was reason for new and genuine hope. It was like having Pedro Martinez in the starting rotation, it felt like this really could be the year.

Well, the bill approved recently for next year increases Coast Guard accounts by nearly \$600 million, a 15-percent boost. It also includes \$125 million to help modernize aging planes, helicopters, and motor lifeboats and upgrade rather than abandon Coast Guard stations in the communities that they serve.

Years from now, the 395 Members of this House who voted for that bill can look back and take satisfaction from the knowledge that they helped save a life, a coastal community, an international alliance, and maybe even a marine species or two. But that old curse still hovers over the Coast Guard, the curse of the "can do."

Just this week, the Senate came in at \$250 million less than the House appropriation. The timing could not be worse. The Senate action followed two recent rounds of Coast Guard cutbacks for the current fiscal year, reducing cutter days and flight hours by 10 percent.

I wonder if the men on the fishing vessel that are being rescued in this picture to my right would approve of a 10-percent reduction, meaning a slower response time. I ask my colleagues and the American people to reflect on this photo and the reduction that I just mentioned.

Why? Because the Coast Guard responded to natural disasters but the Congress failed to pass emergency supplemental funding and because a variety of overdue personnel benefits for everything from housing to health care were mandated by the current defense authorization but with no money to pay for those increased costs.

There is more. The good news is a new effort through the pending military construction bill to restore \$800 million in supplemental funds. But since only a third of that is designated as emergency expenses, the baseline for future Coast Guard budgets next year and beyond would be seriously compromised.

So I rise today to express gratitude for the progress made in this chamber so far but also to raise a warning flag about the two challenges immediately ahead.

Specifically, I urge my colleagues to hold firm in conference on the House approved allocation in the transportation appropriation bill and then to recede to Senate conferees regarding the \$800 million in the MILCON measure. That is what it will take for the Coast Guard to do the job we have assigned to it, to contain oil spills, to catch smugglers, and, most important of all, to save lives.
